#### 10th

2017

## PROJECTS

### Health and Fitness Awareness Website

- Developed a responsive and user-friendly health and fitness awareness platform.
- Utilized React js and css for front-end design to create an engaging user interface.
- Built the back-end using Spring Boot to handle server-side logic and user interactions.
- Implemented MySQL for efficient data storage and management, ensuring scalability.
- Integrated features like fitness tracking, health tips, and personalized workout plans to promote wellness.
- Ensured seamless user experience through effective front-end and back-end integration.
